

CARESAFE 360™

FOR HOSPITALS

Healthcare Environmental Hygiene & EVS Modernization Program

One Platform. Multiple Modalities. One Standard of Care.

CareSafe 360™ unifies advanced cleaning, disinfection, antimicrobial protection, indoor air & HVAC support, and real-time documentation into one accountable program that helps reduce risk, improve consistency, and support better patient and staff outcomes.

WHY CARESAFE 360™ DRIVES BETTER OUTCOMES

- Reduce HAIs and environmental contamination
- Standardize EVS execution and documentation
- Address labor shortages and turnover
- Improve room-turn and operational efficiency
- Support compliance and regulatory readiness
- Improve indoor environmental quality
- Reduce chemical complexity and waste

CLEAN > DISINFECT > PROTECT > IMPROVE AIR > DOCUMENT > STANDARDIZE

1 in 5

Healthcare-associated infections (HAIs) are environmentally acquired*

\$28.4B

Estimated annual cost of HAIs to U.S. hospitals*

Up to 50%

Of EVS time spent on manual, repetitive floor care*

60%+

Of hospitals report EVS documentation gaps*

Technology Modalities Inside the Platform.

The platform integrates multiple environmental technologies around the outcome.

1. Gausium Autonomous Operations

Autonomous cleaning that is data-driven intelligence, data-verified performance across your environment.

- Autonomous floor care
- Data-driven cleaning
- Scalable across zones

2. UV-C Room Disinfection

Autonomous UV-C robots deliver targeted, data-logged disinfection to reduce pathogens on air and surfaces.

- 360° UV-C coverage
- Data-logged outcomes
- Safe, autonomous cycles

3. Enhanced Surface + Room Disinfection

aerosol disinfection system delivers broad-spectrum disinfection at scale.

- Hospital-grade chemistry
- EPA-registered solutions
- Electrostatic + fogging support

4. Electrostatic Sprayer Portfolio

JetPack Backpack System

Mobile Cart System

Jet H2 Ultra Handheld System

Liquid Q induction-charged electrostatic sprayers deliver precision coverage, efficient chemical use, and wrap-around coverage at scale—with less waste and overspray.

- Induction-charged precision
- Wraparound coverage
- Lower waste & overspray
- Up to 18,000 sq. ft/hr
- Platform options: handheld, cart, backpack, and cart systems

5. Antimicrobial Surface Protection

Long-lasting antimicrobial barriers inhibit microbial growth and support continuous protection between cleanings.

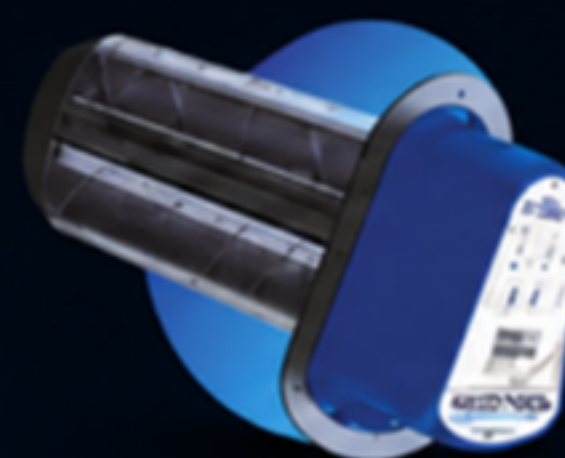

- Residual surface protection
- EPA-registered solutions
- Extends cleaning outcomes

6. Indoor Air + HVAC Support

Air purification and HVAC-safe solutions improve indoor air quality and reduce airborne contaminants.

RGF REME HALO® LED In-Duct Air Purifier

RGF Lucidium® CUV Air & Surface Disinfection

- Reduces particulates
- Supports HVAC systems
- Improves IAQ outcomes

7. Sustainable On-Demand Cleaning

Force of Nature Pro On-Demand produces fresh hypochlorous acid (HOCl) on site to deliver powerful, EPA-registered cleaning and disinfection—right when you need it, where you need it.

- HOCl on-demand
- EPA-registered
- Safe for people & surfaces

CARESAFE 360™ DELIVERS MEASURABLE VALUE

Lower Infection Risk

Standardized Execution

Labor Productivity

Operational Efficiency

Compliance Readiness

Better environments. Better operations. Better outcomes.

THE CARESAFE 360™ OPERATING FRAMEWORK

Technology + Process = Measurable Outcomes

POLICY

PROCEDURE

TECHNOLOGY

TRAINING

DOCUMENTATION

SCALE + SUPPORT

A disciplined operating system that drives consistency, accountability and results across every facility.

WHO WE SERVE

- Hospitals & Health Systems
- Ambulatory Surgery Centers
- Outpatient Clinics
- Long-Term Care Facilities
- Behavioral Health Facilities
- Dialysis Centers
- Laboratories & Other Healthcare Environments
